DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a process, system or article for computing a first and a second sum of products followed by adding the two products to produce a result via a mathematical algorithm. The claims are not limited to a practical application of the mathematical algorithm because the result is not a tangible result because it is not a real-world result.

While claim 1 calls for a “machine-accessible medium” and claim 17 calls for “apparatus” to perform the mathematical algorithm the result produced is still not real-world, hence not tangible, hence not providing a practical application. However, even if the "machine-accessible medium" or "apparatus" was considered as providing a practical application the claims cover every substantial practical application of the mathematical algorithm and for all practical purposes pre-empt the mathematical algorithm, Benson, 175 USPQ 673.

Claims 1-7 fail to fall within any of the statutory categories of invention because the recited “machine-accessible medium” includes “a network server” which in view of paragraph 0029 of the specification may include a signal”.

Art Unit: 2193

Claims 8-16 and 19-21 fail to fall within any of the statutory categories of invention because a 101 process must be tied to another statutory class or an article or material must be transformed to a different state or thing.

Applicants argue that the claims have been amended to “more particularly pointing out practical applications” but no particular language is referenced. The identifying of the data as “audio” or “visual” does not provide a practical application.

Claim Rejections - 35 USC § 112

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 6; the meaning of the phrase “network server” is unclear, note that the phrase does not appear in the specification. What is meant by saying that a "network server" is a type of "machine-accessible medium"?

Allowable Subject Matter

3. Claims 22-33 are allowed.

Conclusion

4. This is a RCE of applicant's earlier Application No. 10/749,738. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier

Art Unit: 2193

application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **DAVID H. MALZAHN** whose telephone number is (571)272-3727. The examiner can normally be reached on M-Th from 7:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lewis A. Bullock Jr, can be reached on 571-272-3759. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
